

SWATI LUKHI

Buffalo, NY | 336 488 9253 | swatidl0209@gmail.com | [LinkedIn](#)

TECHNICAL SKILLS

Data & Analytics: Python (Pandas, NumPy, Scikit-Learn), SQL, Data Analysis, Data Engineering, Data Pipelines, ETL/ELT, Data Warehousing, Data Modeling, Data Transformation, Data Wrangling, Data Validation, Data Quality, Data Governance, Workflow Automation, Statistical Analysis, Exploratory Data Analysis (EDA), Machine Learning, Predictive Analytics, Feature Engineering, Forecasting, KPI Tracking
BI & Reporting: Tableau, Power BI, Business Intelligence, Business Analysis, Dashboard Development, Data Visualization, Reporting Automation, Requirements Gathering, Stakeholder Collaboration, Process Improvement, Regulatory Reporting, Audit Documentation
Databases & Tools: PostgreSQL, MySQL, Relational Databases, REST APIs, Sequelize, Swagger, Git/GitHub, Jira, VS Code
AI & Cloud: Azure OpenAI, Azure AI Vision, Azure AI, OCR, Computer Vision, LLM Applications, Prompt Engineering, AI-Powered Data Extraction, Supervised Learning, Model Evaluation, Azure Blob Storage, AWS S3
Development: React.js, TypeScript, JavaScript, Node.js, Express.js, REST APIs, GraphQL, HTML5, CSS3

EXPERIENCE

AI & Data Science Analyst

Wetechforu IT Company

May 2026 - Present

Remote

GreenAssetIQ (AI Asset Recognition Platform)

- Engineered OCR, computer vision, and catalog-matching workflows that improved AI device-identification accuracy, raising data quality and reducing manual data review across thousands of asset records.
- Architected automated ETL pipelines leveraging Azure AI Vision, OCR, and Azure OpenAI LLMs for AI-powered data extraction, transforming and loading high-volume asset data to accelerate reporting and decision support.
- Developed Python data validation and transformation logic for make/model/category classification, strengthening data quality and improving the accuracy of downstream predictive analytics and reporting.

Data & Technology Intern

Wetechforu IT Company

Jan 2026 - May 2026

Remote

- Developed and optimized SQL queries and ETL pipelines (REST API & CSV) feeding a centralized reporting layer, automating workflows and improving data accuracy, reconciliation, and data governance.
- Conducted exploratory data analysis (EDA) and statistical analysis on engagement, traffic, and keyword data to surface trends, delivering data-driven recommendations that drove measurable organic growth.
- Automated KPI tracking through Tableau and Power BI dashboards and delivered competitor and market analysis, collaborating with cross-functional stakeholders to support data-driven business decisions.

IT Help Desk - Student Assistant

SUNY Buffalo State University

May 2025 - May 2026

Buffalo, NY

- Resolved first-level technical support across Windows and macOS and triaged tickets in a structured ticketing system, reducing issue-resolution time.
- Improved equipment reliability and uptime by diagnosing hardware issues, escalating complex cases, and maintaining structured resolution data for tracking, auditing, and reporting.

Web Developer

N R Crew

Aug 2022 - Dec 2024

Ahmedabad, India

- Engineered data-driven applications with React.js and TypeScript, integrating REST APIs and Node.js services for real-time data extraction, transformation, and exchange.
- Delivered client projects including an AI investment platform (RISI), property management app (EBuilding), dairy management tool (Trackhub), and babysitter booking platform (Ankle Patrol).

Jr. Web Developer

SystemSeeders Infotech LLP

Jan 2022 - Apr 2022

Ahmedabad, India

- Developed responsive web apps using HTML, CSS, JavaScript, and PHP; contributed to the PedagogicalAura educational platform with interactive learning modules and backend API integration.

EDUCATION

M.S. in Data Science and Analytics

SUNY Buffalo State University | GPA: 3.90/4.0

Jan 2025 - May 2026

Buffalo, NY

B.E. in Information Technology

Sal College of Engineering (GTU) | GPA: 3.18/4.0

Aug 2018 - Apr 2022

Ahmedabad, India

PROJECTS

AutoGuard ML - Vehicle Recommendation System

Jan 2026 - May 2026

- Built an end-to-end machine learning recommendation platform with ETL pipelines integrating NHTSA/FuelEconomy.gov REST APIs (Python, Scikit-Learn); applied EDA, data validation, and feature engineering to score safety, cost, and fuel efficiency.

Airbnb Investment Analytics

Aug - Dec 2025

- Analyzed 123K+ listings using SQL, Python, and Pandas; built ETL pipelines and interactive Tableau dashboards delivering revenue, occupancy, pricing, and seasonality insights for business intelligence and forecasting.

Morth's Landscaping - Business Dashboard

Jan 2025 - May 2025

- Designed a MySQL relational data model with Node.js services to automate real-time KPI reporting, reducing manual effort and supporting operational decision-making.

Parking Management System

- Designed a PostgreSQL relational database for a parking system handling slot allocation, entry/exit tracking, and automated billing.
